ELECTRO-MECH

COMPONENTS

## - Dual or Four Lamp/LED Capability <br> - Horizontal or Vertical Split Legend Lenses <br> - Meets Sunlight Readability of MIL-PRF-22885

Electro-Mech has introduced its SW44267 model pushbutton switch assembly featuring quad LED capability which meets the sunlight readability requirements of MIL-PRF-22885 for cockpit and ground based installations. Switch mounts in industry size standard mounting hole, accomodates SPST-DPDT circuitry, and is available in momentary or alternate action switch functions.

1.1 oz. ( 30 g ) (approx.)

Momentary or Alternate Action (SW44267 = momentary snap feel) 100,000 minimum
Silver plated (Gold plated contacts available)
Standard EMC solder lug. Accepts two 20 AWG wires. PC pin terminals also available.
Four T-1 (3mm) sub midget flange base LED's; external resistor to operate at 28vdc Hidden legends; Legends illuminate in color (Visible legends also available).
$\mathrm{CL}=0.819, \mathrm{CuL}=0.574$

electro-mech

## * Reliable snap action switching * SPST circuitry <br> * Hidden and custom legends available * Accomodates one T 1-3/4 mfb lamp or LED

Featuring a snap action design and versatile legend display options, Electro-Mech Components introduces the new SW44188 family of SPST momentary snap action switches. Originally designed for cockpit trainers and simulators, the new switch is suitable for use in a variety of commercial, military, and industrial applications.

## Specifications:

Linear or Tapered
Cermet or Plastic

## Notes:

1. Plunger differential for push-on/remain-in/push-off switches is $0.150+0.010$.
2. The potentiometer shaft can be manufactured with a flat or be knurled at the end of the shaft for knob mounting. EMC can furnish the assembly with a knob or the customer can procure knobs separately.
3. The potentiometer terminals can be either solder lug terminals, straight PC pins, or hooked PC pins.

## How to Order:

Please call the factory for a copy of a specific configuration drawing. All configurations are assigned a custom (SW) drawing number in the sequence SW4xxxx.

File:Pot-switch 20050711

## Features

- compact combination switch
- SPST, NO, hall effect IC switch
* <1" behind panel depth
-100K potentiometer value
- 1/2" square body size
- front facing PC pins

## Electro-Mech Announces Its Compact Potentiometer Switch

The hall-effect switch + potentiometer assembly offers the advantages of both digital and rotary control in a compact size for audio volume preset in avionics cockpit applications. Illumination of the edgelit knob is via an edgelit panel. Front facing PC pins allow unit to be mounted from behind the panel.

Specifications (drawing SW44109 REV B):
Weight: 1.0 ounce maximum
Operating Temperature: $-40^{\circ} \mathrm{C}$ to $+95^{\circ} \mathrm{C}$
Operating Pressure: $35 \pm 5$ ounces
Switch Travel: 0.060 nominal
Actuations: 100,000 minimum
Switch Action: snap-feel momentary
Potentiometer: 100K linear (S) taper (can be specified)
Mechanical Rotation: $295^{\circ}$
IC supply voltage: 3.8 vdc minimum
IC supply current: 5 mA maximum
Note: Edgelit knob is supplied with this assembly.

Specifications (drawing SW44109 REV B) (not to scale):

## Backlit Potentiometer+Switch SW44175

## Features

- backlit potentiometer+switch
- SPDT alternate action switching
- 3/4" dia. round button
- 7/8" dia. round mounting hole
- backlit with 4 discrete LED's

Electro-Mech's SW44175 backlit potentiometer switch offers both rotary and push-on/push-off functionality plus backlighting for maximum operation control. The SPDT switch enables the user to specify a value so that at the push of a button, the circuit or channel automatically opens at the preset level. 3/4" pushbutton lens assembly allows insertion of custom legends. Illumination features four discrete LED's with built in resistor for illumination at 24 vdc .

## Specifications (not to scale) (Drawing SW44158):

COMPONENTS

Electro-Mech Components offers many custom switch designs illuminated by built-in LED's. All versions include a built-in resistor for operating at a specified voltage. Here are three examples:

## SW43745 BI COLOR LED SWITCH

## Features:

- compact, light weight
- bi-color LED (r,g,r+g)
- built in wire harness
- 8 oz. op. pressure
- clear lens cap
- SPST, NO circuit
- momentary only
- mounts in $3 / 8^{\prime \prime}$ hole
- front panel mount
- specify p/n SW43745

Features:

- compact, light weight
- single color LED
- 8 oz. op. pressure
- colored lens cap
- SPST-2PDT
- momentary only
- mounts in $3 / 8^{\prime \prime}$ hole
- front panel mount
- specify p/n SW43716

## SW43716 COMPACT LED SWITCH

E.D. SCHEMATIC

SW43813 SNAP IN LED SWITCH

## Features:

- colors: G, R, or Y/A
- $5 \mathrm{vdc}-28 \mathrm{vdc}$
- 8 oz. op. pressure
- white lens cap
- SPST - DPDT
- momentary or alt. act
- mounts in $3 / 4^{\prime \prime}$ hole
- front panel mount
- specify p/n SW43813

## Modification Codes

Switch and indicator modification codes below are adapted from and comply with the Pendar (Pollak/G.I.) pushbutton switch products. EMC acquired this product line in 1997.

## Series 2100

## Sub Panel Mount <br> Pushbutton Switch

## Illuminated and Non-Illuminated Models

* Momentary or Alternate Action switching actions
* SPST - DPDT switch circuitry
* Easy lamp replacement from front

* T 1-3/4 midget flange-based lamp or LED enhanced by replaceable lens covers available in standard EMC colors
* Environmentally sealed models available (specify modification code "W")
* Multi-station interlocking assemblies (see Series 400/500)

* Snap-in front panel mounting (see Mounting Adapters)

In the Series 2100, Electro-Mech offers a slimline version of its standard illuminated pushbutton switch. A unique product design features silver slide bar action reducing contact bounce to an absolute minimum, thereby giving longer life and greater reliability.

## Series 2600

## Sub Panel Mount <br> Pushbutton Switch

Illuminated and Non-Illuminated Models

* Momentary or Alternate Action switching actions
* 2PDT-6PDT switch circuitry
* T 1-3/4 midget flange-based lamp enhanced by replaceable lens covers available in standard EMC colors
* Environmentally sealed models available (specify modification code "W")
* Multi-station interlocking assemblies (see Series 400/500)

* Snap-in front panel mounting (see Mounting Adapters)

Electro-Mech Series 2600 switches provide substantial long life and reliability in a highly versatile design, serving as an industry standard since its inception.

Standard models are available from 2PDT to 6PDT in 160 different configurations, including non-illuminated versions.

Applications include panel control switching in any front panel application for avionics, broadcasting, communications, heavy industrial controls, and transportation industries.

How to Order:

## Multi-Switch Assemblies:

Switch has a $1 / 2^{\prime \prime}$ diameter neck and is attached with a c-clip. Specify "GH" before switch part number (e.g. GH2652).
Switches can be mounted on $3 / 4$ " center to center dimension. See Series 400/500 for more details.

Front Panel Mounting Adapters:
The 2600 Series switches can be mounted to the front panel using EMC adapters 65-, 67-, 68-, 72-, 73-, and 75-. Specify flush mounted lenses by adding modification code "EL" (e.g. 75EL-2654).

## Series S520

Subminiature Snap Action Momentary Switch

## Illuminated and Non-Illuminated Models

* Compact design requires only 3/4" behind panel
* SPST, N.O., Momentary
* Easy lamp replacement from front
* T-1 sub-midget flange-based bulb
 or LED enhanced by replaceable lens covers available in standard EMC colors*
* Sealed models available

Ideally suited for a wide range of uses, particularly in aircraft and avionics applications such as cockpit and passenger seating unit (PSU) light indicators, or any high-density display requirement, the Series S520 offers a miniature, easy-to-install unit with excellent reliability characteristics. The compact design requires only $3 / 4^{\prime \prime}$ depth behind front panels, and bulb or LED replacement can be completed from the front.

Featuring momentary snap action, SPST, with a T-1 (3mm) sub-midget flange-based bulb or LED, lighting intensity and color is enhanced with the unit's choice of standard, $1 / 4$ inch diameter replaceable lens buttons which are available in standard EMC colors: amber, blue, green, red, white, yellow, orange and black (non-lit). The unlighted version meets MIL-S-8805/64 requirements. An optional environmental sealed design is available.

## electro-mech

## Series S520

## Subminiature Snap Action Momentary Switch Illuminated and Non-Illuminated Models

Formerly manufactured as Pendar/Clare Pendar and General Instruments S520. Series S520 models can be provided with wire leads, ribbon cable or direct-mount PCB pins. For non-illuminated Series S510, contact factory for applicable custom drawing(s).

# Series S570 

Sub Panel Mount, DPDT or 4PDT
Snap Action Pushbutton Switch
Metal Case
ELECTRO-MECH
COMPONENTS

P/N S570-22,L7161GRY

* Compact size
* DPDT or 4PDT circuitry
* $1 / 2^{\prime \prime}$ or $9 / 16$ " diameter mounting hole
* Rugged snap action design

Electro-Mech Series S570 is a compact, snap-action DPDT (or 4PDT) switch with an independent lamp circuit. The switch series is available in both 2 Form C (DPDT) or 4 Form C (4PDT) versions which are ideal for reliable power circuit operation where snapaction switching is preferred. The S570 is a rugged switch (designed to meet Mil-PRF-22885) that has been increasingly applied in the most demanding commercial and industrial applications. This product series was formerly manufacturing by Pendar/General Instruments/Pollak Pendar Switchlight Division.

Ordering Information:
Series S570 is available with a choice of three switching actions:

S570 Momentary
S571 Alternate Action
S572 Push-On/Remain-In/Push-Off
Specify S57x-22 for 2PDT circuitry.
Specify S57x-44 for 4PDT circuitry.
There are several standard modifications available per the EMC modification codes including: AE, AF, BA, GP, W

Specifications:
Ratings:
at 28vdc: 2A resistive, 0.5A ind. at $125 \mathrm{vac}: 1 \mathrm{~A}$ resistive

## CUSTOM PRODUCT ANNOUNCEMENT

## Application Requirements

CUSTOMER: Custom designed for Teletrac (formerly AirTouch Teletrac), Leawood, Kansas. CUSTOMER REQUIREMENTS: Rugged, sealed, non-illuminated pushbutton switch to be foot activated in the floor panel of an automobile or taxicab. Resistant to water, sand, salt, mud, snow, and boot heels.
PRODUCT APPLICATION: Panic switch: Cellular warning system in vehicles in case of attempted robbery or carjacking.
INSTALLATIONS: 14,000 as of June, 1997
RESULTS: In the first month of installation, a taxi driver was being held up. He hit the foot panic switch and signalled a police patrol. Within 5 minutes, the robbery suspect was apprehended.

## Electro-Mech Components Switch Design: drawing SW43518

SWITCH: modified 5400 Series pushbutton switch, SPDT, non-illuminated.
LENS: solid nickel-plated brass button bottoms out on switch case preventing damage when depressed by driver's foot.
WIRE LEADS: 18" wire leads for customer installation.
SEALED BASE: epoxy encapsulation of terminal base and wire terminations to seal switch.

## Specifications (not to scale):

## Series 3000

## Solenoid Hold Down Switches 2PST-6PDT Pushbutton Switch

ELECTRO-MECH
COMPONENTS

Electro-Mech Series 3000 Solenoid Hold Down Illuminated pushbutton switches offer added panel and system control flexibility in a combined reliable lighted PB switch (2PST to 6PDT), and electrically energized solenoid holding coil.

When the coil is energized, the switch will be held in the down position after being actuated. When the coil is de-energized, the switch returns to its relaxed position. When the coil is not energized, the switch functions as a momentary action switch. When external power is supplied to the solenoid coil, the switch can be remotely released.

Twenty-four standard models are available, in a variety of normally open (N.O.) and normally closed (N.C.) circuit configurations.

Double throw circuitry units are available 2PDT to 6PDT, with either
12 vdc or 28 vdc solenoid coils:
12 vdc coil rated at $90 \mathrm{~mA}, 133$ ohms $\pm 10 \%$
28 vdc coil rated at $60 \mathrm{~mA}, 500$ ohms $\mp 10 \%$
Specifications:

| Ratings: | 30 volts DC or 125 volts AC; 2.0A resistive, 0.5A inductive |
| :--- | :--- |
| Weight: | 0.8 oz. $(23 \mathrm{~g})($ approx. $)$ |
| Operating Pressure: | 32 oz. $16 \mathrm{oz} .(908 \mathrm{~g} \pm 454 \mathrm{~g})$ |
| Plunger Travel: | 0.187 approx. $(4.7 \mathrm{~mm})$ |
| Actuations: | 100,000 minimum |
| Contacts: | Silver plated |
| Terminals: | Standard EMC solder lug. Accepts two 20 AWG wires. PC pin terminals also available. |
| Lens: | Accommodates any standard EMC lens. See Single Lamp Lenses. |
| Lamp or LED: | Accommodates one T 1-3/4 (5mm) MFB lamp or LED. Lamp circuit is independent. |

## electro-mech

## ELECTRO-MECH

COMPONENTS

3600/3700 Alternate Action switch can be remotely released
O 3800/3900 Fail-Safe operation protects circuitry/systems
O Waterproofed for environmental or military applications
Designed and manufactured to meet MIL-PRF-22885
Accepts all standard EMC lenses, filters, and lamps/LED's (specify L7xxx PD style lens)
64 standard styles: 3PST, 4PST, and 6PST

This Electro-Mech Series of solenoid release switches provides an excellent choice of conventional alternate action or increasingly popular fail-safe alternate action switching in a variety of styles.

Proven in critical applications such as military and avionics installations, the fail-safe reliability of the Series 3800/3900 offers an ideal switch consideration for emerging industrial controls, process and instrumentation uses in commercial, yet vital areas of dependable solenoid-style switching functions.

## SOLENOID RELEASE SWITCH

Series 3600PD - Alternate Action
Series 3700PD - Alternate Action (Remain In)
Units can be remotely released from the activated (depressed) state by energizing the solenoid release coil. Coil is rated for intermittent duty ( 30 seconds maximum). Based on an industry standard, $3 / 4^{\prime \prime}$ [ 19 mm ] panel mount switch design, the Series 3600/3700 is provided in a compact 3.00 " $\left[76.2 \mathrm{~mm}\right.$ ] housing ( $2.16^{\prime \prime}$ [ 54.9 mm ] behind the panel). Units are configured similar to Electro-Mech Series 2700 ( $\sim 3600$ ) push-on/pushoff and Series 2800 (~3700) push-on/remain-in/push-off switches except for the solenoid release operation feature.

## FAIL-SAFE SOLENOID SWITCH

Series 3800PD - Alternate Action
Series 3900PD - Alternate Action (Remain In)
Most common usage of this fail-safe switch is to release the switch from the ON position if the power fails. When the solenoid coil is energized, the switch operates as an alternate action switch. Units are configured similar to Electro-Mech Series 2700 ( $\sim 3800$ ) push-on/push-off and Series 2800 (~3900) push-on/remain-in/push-off switches. When the solenoid is de-energized, the switch will return to the OFF position and then will operate as a momentary snap feel switch, similar to EMC Series 2500.

ELECTRO-MECH
COMPONENTS

For $6 x-4 \times 30$ dimensions (switches with bezels), refer to "Mounting Adapters" specifications.

* Low profile, matches EMC Series 2600 sizes
* Momentary or alternate action switching
* Front panel mount or sub panel mount

Applications requiring front-panel power switch to 10A will find this popular sized, compact unit to meet every requirement. Designed for UL applications, the Series 4000 is available in standard metal housing for sub-panel mounting, front panel mounting with bezel adapter, or all-plastic unitized housing.
Snap-action performance is reliable, and circuitry and terminals are ruggedly designed for full current capacity. Popular, low-profile design matches other low-current EMC product Series. Special options on other EMC Series' also available on the Series 4000.

# Series 5100 <br> Front Panel Mount, SPST-2PDT <br> Momentary Pushbutton Switch Illuminated and Non-Illuminated Models 

ELECTRO-MECH
COMPONENTS

* Short housing requires <1.38" behind panel

* Momentary switching
* Recessed lens design
* Light operating pressure
* Accomodates 0.50" [12.7] dia. round lens

#### Abstract

The Electro-Mech Series 5100 provides momentary switching in a compact, 1.375 " behind the panel housing, saving up to $25 \%$ of usually required space needed by other popular models. These small switches are ideal for keyboard matrix assemblies and with their new recessed lens they offer even greater compactness and beauty.

Positive action, reliable circuitry, and proven low-bounce characterisitcs are offered in this fully enclosed aluminum housing design, ideal for tight packaging requirements and keyboard assemblies. Standard models are supplied with slide-action silver contact circuitry usually found in larger units. Gold plated contacts can be supplied for dry circuit applications.

* Light operating pressure
* Accomodates all EMC standard lenses

#### Abstract

Electro-Mech is offering a miniature lighted or non-lighted pushbutton switch to be used in all types of keyboard matrix assemblies. These small switches feature momentary switching in a compact, $1.25^{\prime \prime}$ behind the panel housing. With an extra light touch of just 8 oz., these miniature switches are ideal for any type of keyboard. High density mounting is also capable side-by-side on $3 / 4$ centers with an optional round slotted nut. Positive action, reliable circuitry, and proven low-bounce characterisitcs are offered in this fully enclosed aluminum housing design, ideal for tight packaging requirements and keyboard assemblies. They also utilize Electro-Mech's unique design concept of silver slide bar action which makes it possible for them to handle low amperage switching, for a half million actuations minimum life. Gold plated contacts can be supplied for dry circuit applications.

# Series GH5300 <br> Sub Panel Mount, SPST-2PDT Momentary Pushbutton Switch Illuminated and Non-Illuminated Models 

ELECTRO-MECH
COMPONENTS

## Features

* Momentary switching
* High density, 5/8" centers mounting available
* Light operating pressure
* Accomodates all EMC standard lenses
* 500,000 actuations minimum at 0.5A resistive

Electro-Mech Series GH5300 lighted pushbutton switch provides momentary switching in a compact sub-panel mount design, eliminating threaded type hardware which enables switch mounting on $5 / 8$ " $[15.9 \mathrm{~mm}]$ centers. These small switches mount through a $1 / 16$ " $[1.6 \mathrm{~mm}$ ] thick panel and are secured in place by a retaining ring (c-clip) (supplied). Custom matrix designs and gang assemblies are readily fabricated to meet customer needs.

The Series GH5300 has all of the features offered in the Series 5300, including positive action, reliable circuitry, and proven low-bounce characteristics in a fully enclosed aluminum housing design. This switch also utilizes Electro-Mech's unique design concept of silver slide bar action which makes it possible for them to handle low amperage switching, for half million actuations without failure. Gold plating can be specified for dry circuit applications.

ELECTRO-MECH
COMPONENTS

## ELECTRO-MECH

COMPONENTS

* Full sized displays in compact size
* Momentary or alternate action switching
* SPST - 2PDT with independent lamp circuitry
* Accomodates $1 / 2$ " square EMC lens

The Electro-Mech Series 61 switches are provided in 1/2" square (lens), snap-in or hardmount configurations. Each low profile unit features a silhouetted appearance and is available in any switch circuitry SPST-2PDT, each controlled with independent circuitry for reliability. The all plastic, unitized housing assures easy handling and helps insulate the switch from other surrounding components. The Series 61 is also available in standard PC pins for direct mounting to PCB. Mounting hardware is with either aluminum Clip Springs (CS) or hardmount backup channel (HM).

61 10/2003

## Series 20

## Illuminated and Non-Illuminated Models

ELECTRO-MECH
COMPONENTS

* Momentary or Alternate Action switching actions
* SPST - DPDT switch circuitry
* Easy lamp replacement from front
* T 1-3/4 midget flange-based lamp or LED enhanced by replaceable lens covers available in standard EMC colors
* Seven button sizes all mount into same sized $5 / 8$ " diameter mounting hole
* Low profile appearance in one unitized switch housing.

Available options include:
GP = gold plated contacts for low level switching
PC = printed circuit board terminals
AF = round slotted nut
Other custom designs have included matching indicator lights, non-lighted switches, clip spring mounting. Housing color can be custom molded.

Electro-Mech's Series 20 switches are provided in $1 / 2^{\prime \prime}, 5 / 8^{\prime \prime}$, and $3 / 4^{\prime \prime}$ square or round, and $1 / 2^{\prime \prime}$ $\times 3 / 4^{\prime \prime}$ display configurations, all mounting in the same size $5 / 8^{\prime \prime}$ diameter round mounting hole from the front of the panel. These low profile units are available in any switching mode with independent lamp circuitry from SPST to DPDT. The all plastic, unitized housing assures ease in handling (no adapters, clamps, or brackets). Just drop the switch in the round hole and secure with a hex nut or round slotted nut from behind the panel.

Series 20 switches have the same internal parts as the all metal Series 6100, including positive action, reliable circuitry and proven low bounce characteristics made possible by our unique design concept of silver slide bar action.

ELECTRO-MECH
COMPONENTS

P/N 65ELCS-350,L63R
EL option = flush mount lens

* Front panel mount with backup or clip springs
* Momentary switching only
* High density 7/8" centers mounting available
* Accomodates 3/4" square EMC lenses
* 9 ounces operating pressure

The Series 60-350 is a shorter behind panel length than the EMC Series 60. The switch is designed for mounting from the front of the panel into a standard "hard mount" fixture, a " U " shaped bracket which is quickly fastened to the back of the panel with two mounting screws. Snap in mounting using two aluminum clip springs is also available (specify modification code "CS", e.g. 65CS-150). Switches can be individually mounted or, in the case of the 67-and 68- configurations, can be stacked in a row. Mounting hole for stacking: width is 0.875 , length is $0.875 \times \#$ of switches.

Adapter options: $65-x x x \quad$ No barriers/ears 67-xxx Double barriers/ears 68-xxx Single barrier/ear
Note: Hardmount standard. For Clip Springs, specify "CS"

## Series 73

## Front Panel Mount, SPST-2PDT

 Momentary Pushbutton SwitchELECTRO-MECH

* Front panel mount with backup or clip springs
* Momentary switching only
* Large, legible displays
* Accomodates 3/4" x 1-1/2" rectangular lens
* 9 ounces operating pressure

Series 73 switches feature convenient, $1-1 / 2^{\prime \prime}$ wide $\times 3 / 4$ " high illuminated pushbuttons for all types of fast read and emergency switching applications. Easy snap-in ("CS") or hardmount ("HM") mounting options are available. All plastic unitized housing provides insulation. Switching circuitry is available from SPST to DPDT plus the lamp circuit.

## Mounting Specifications

Mounting hole size of $1.625(+0.010 /-0.000) \times 0.875(+0.010 /-0.000)$
Standard mounting clip spring ("CS") fits panel thicknesses up to 0.125 ".
For panel thicknesses $0.125^{\prime \prime}-0.250$ ", specify "CSZ" (e.g. 73CSZ-349).
Filters and Part Number Options
Standard lenses and filter colors are white(W), red (R), blue(B), green(G), yellow $(Y)$, and amber(A). See Single Lamp Lenses. Available in both solid colored lens cap (p/n L67c) and removeable clear cap option lens assembly ( $\mathrm{p} / \mathrm{n}$ L57c).

# Pushbutton Switch Mounting Options Flush Mount Switch 

ELECTRO-MECH
COMPONENTS

P/N 75EL-2128,L123B-ELFG

A complete selection of industry standard, flush mounted, lighted pushbutton switches and indicators is offered by Electro-Mech, for applications requiring acci-dent-proof operating and non-removeable lenses (optional). Popular $1 / 2^{\prime \prime}$ and $3 / 4^{\prime \prime}$ square lenses, plus rectangular and round pushbutton lens configurations are available as a standard design on existing snap-in or hard mount switches with circuitry SPST-6PDT.

Mounted flush with the switch housing or mounting panel surface, the lens cannot be removed from the front of the panel, but is removeable by pushing the lens out from behind the panel, an important feature in applications in public areas such as vending machines and video gaming machines. As a safety feature, flush button surface of the lens cannot be accidentally actuated. Solid colors or clear top caps in GE LexanTM polycarbonate may be specified in all standard EMC colors, along with engraved lens legends or mylar film legend inserts.

## Applications:

"EL" flush mount may be utilized on any switch or indicator mounted into a plastic or metal mounting adapter. For more information, see EMC Mounting Adapters.

## Ordering Information:

Specify modification code "EL" as a suffix to the Mounting Adapter / Bezel part number: e.g. 73EL-2654, 65ELCS-350.

## Mounting Adapters

## Series 65

- CS option snaps in from front of panel.
- HM option uses U-shaped bracket from back of panel.
- Mounts in panel thickness up to $1 / 8$ ".
- For panels $1 / 8^{\prime \prime}-1 / 4^{\prime \prime}$ thick, specify $65 Z C S$.
- Uses L63 lens (0.74" square).
- Fingernail grooves in lens (L63W-FG) are recommended for easy lens removal.
- Series 65 is supplied with a 0.94 " square flange.
- Mounts in a $0.875^{\prime \prime}(+0.010,-0.000)$ square hole.

## Series 67 and 68

- CS option snaps in from front of panel.
- HM option uses U-shaped bracket from back of panel.
- Mounts in panel thickness up to $1 / 8$ ".
- For panels $1 / 8^{\prime \prime}-1 / 4^{\prime \prime}$ thick, specify $67 Z C S$ or 68ZCS.
- Uses L63 lens (0.74" square).
- Fingernail grooves in lens (L63W-FG) are recommended for easy lens removal.
- Mounts in a 0.875 " (+0.010,-0.000) square hole.
- One 67- bezel and several 68- bezels may be mounted in a single rectangular cut-out.

## Series 65-210 \& 73-210

Front Panel Mount Indicator Lights

## Model 65-210

Available in two mounting styles:
"CS" = snap in from front of the panel with Clip Springs sample part number: 65CS-210,L63R
"HM" = mounts from back of the panel, and is attached to the panel by a U-shaped bracket and 2 screws e.g. $65 \mathrm{HM}-210, L 53 W$ or just 65-210,L53W Mounting Hole: 0.875 " square (+0.010/-0.000)
CS: Standard "CS" for panels up to 0.125 " thick
CSZ: For panels 0.125-0.250, specify "CSZ"
Material: Black GE Lexan (also available in white or grey)
Lens: Accepts EMC L53* or L63* size pushbutton lens
Lamp: Lens accepts one T 1-3/4 (5mm) mfb lamp or LED

Product shown is similar to: P/N 73HM-210,L67R

## Model 73-210

Available in two mounting styles:
"CS" = snap in from front of the panel with Clip Springs sample part number: 73CS-210,L63R
"HM" = mounts from back of the panel, and is attached to the panel by a U-shaped bracket and 2 screws e.g. 73HM-210,L57W or just 73-210,L57W

Mtg Hole: $1.625(+0.010 /-0.000) \times 0.875(+0.010 /-0.000)$
CS: Standard "CS" for panels up to 0.125" thick
CSZ: For panels 0.125-0.250, specify "CSZ"
Material: Black GE Lexan (also available in white or grey)
Lens: Accepts EMC L57* or L67* size pushbutton lens
Lamp: Lens accepts one T 1-3/4 (5mm) mfb lamp or LED

## Series L150

# Replaceable Legend Lenses and Filters Pushbutton Lenses <br> Single Lamp/LED 

ELECTRO-MECH
COMPONENTS

## Applications

Versatile interchangeability with other switch models, choice of color and engravings and non-wearing, clear, acrylic design enables wide-ranging uses of the Electro-Mech Series L150 Replaceable Legend Lens. Lenses may be ordered with a variety of options including clear, frosted or smoke grey top lens cap, and photo positive or negative mylar film legending. Available for most EMC switches.

## Description

Electro-Mech Series L150 Replaceable Legend Lenses are essentially non-wearing, utilizing a GE LexanTM molded top over cap which protects lens legend. Engravings or films on face of lens display are protected by the lens cover. Opaque sides prevent light spill-over. Filters may be specified in a variety of colors. Legends are replaceable enabling display changes and ultimately broader usage and flexibility of the same basic switch or indicator light across several applications. Translucent lens plate conceals color filter until lamp/LED is illuminated. All lenses accomodate one T 1-3/4 midget flange based lamp or LED. Lenses are removeable from the front panel for re-lamping.

## Part Number Options:

Series L150 lenses may be ordered with the following lens options. Specify desired lens engraving and special requirements when ordering. Special colors are available.

Basic Series Number L153W/R/PP engr STOP Indicates color of top plate

ENS BASE
P/N L153-2 or L153-2BLK or
P/N L53-2 or L53-2BLK (without pin)

ELECTRO-MECH
COMPONENTS

## Applications

Electro-Mech Components offers standard lenses in a wide variety of sizes, shapes and colors to fit every requirement for its OEM customers. These lenses are designed to accomodate one T 1-3/4 ( 5 mm ) midget flange base lamp or LED. Lenses are removeable for relamping from the front panel (specify Series EL for non-removeable flush mounted lenses). Lenses can be supplied with engraved or painted legend lenses. Available lens colors are amber, blue, green, grey, orange, red, white and yellow. Some custom colors are available.

## O SPST - 6PDT Switching Functions

Ideal for a variety of applications where several switching functions or status indicators are needed, the Series 600/800 provides remarkable display versatility and multi-lamp/LED redundancy. These compact, low-profile switches can be specified for exacting requirements in both switch function, versatility of lens and legend displays. For added flexibility, legends, filters, and colors can be easily changed in the field.

Series 600 (3/4" square) and Series 800 ( $3 / 4$ " x 7/8" rectangular) units can be specified in singular or multiple switch circuit functions from SPST to 6PDT, with momentary or alternate action switching actions. Independent circuitry increases reliability and a unitized, insulated housing assures proper insulation. Models may be specified with a choice of 2 or 4 lamps or LED's. An optional clear lens cover protects and enhances replaceable filters. Units snap-in from front of panel with a low-profile flush bezel or dividing barriers. Hidden legends also available.

## Specifying Series 600/800 Dual and Quad Lamp Lens Filters and Legends:

1. Specify lens part number from table above. (If lens assembly will accommodate MFB Based LEDs, add a ' 2 ' after the L8.. (e.g. L8211C) as the lens assembly will be built with two internal L814-3 lamp retainer clips).

2a. If replaceable legend lens is required, specify "C" (clear), "F" (frosted), "S1" (smoke grey, glossy finish) or "S2" (smoke grey, with sand blasted finish). This cap will be removeable and legend and filter plates can be changed.
2 b . If non-replaceable legend lens is required, specify "W" (white) or other color code (R, B, etc.). Lens cap will be epoxied to lens base.
3. Standard lens base is white. To order black, specify "black base." (Often used with PN/hidden legend appearance.)
4. Specify photo positive (PP) or photo negative (PN) lens legends after lens cap designation.
5. Specify all four quadrants of the lens assembly regardless of lens part number. The four quadrants are specified 1,2 across the top and 3,4 across the bottom. The four color codes before the slash are the non-illuminated lens color in the replaceable legend lens assembly. After the slash, the color codes are the filter colors. If no filter required, specify "CCCC". Examples: L812W-RRGG/CCCC L815C/PP-GGWW/CCCC engr CKT A, CKT B L838F-WRGY/YCCC L812S2/PN-WWWW/CCCC blk base engr READY, CAUTION We have created many custom lenses including hidden legends, photo positive and negative legend films, and matte finishes. Please contact us regarding your specific requirements.

## electro-mech

## 600/800 Series

## Multi-Image

## 3/4" Square or $3 / 4$ " x 7/8" Rectangular Lighted Pushbutton Switches

## INTERCHANGEABLE LEGENDS/FILTERS

Series 600/800 models may be specified with standard lenses shown on Page 3 of 4 or these replaceable lens/filters for added versatility.

## Ordering Information:

## Sample Part Number:

Basic Series 600 (6) or 800 (8)
Mounting bezel options: 5,7 , or 8
Specify dual lamp (3) or quad lamp (4)
Switch action/number of circuits
See Series 2100 or Series 2600; use same 4 digit identification (page 5)
Lens part number - see table Page 3 of 4
First letter after lens number indicates top cap material (C, F, S1, S2, W, *)
Specify four lens segments - material color on top lens layer
Specify four lens segments - material color on bottom lens layer Lamp or LED part number

## Series 644-2100

## Front Panel Mount, Dual or Quad Lamp/LED <br> Pushbutton Switch <br> with Split Legend and Hidden Legend Lenses

## (iD)

ELECTRO-MECH
COMPONENTS

* Momentary, Momentary Snap Feel, or Alternate Action switching actions

* SPST - DPDT switch circuitry
* Easy lamp replacement from front
* Up to four T-1 sub-midget flange-based lamps or LED's enhanced by hidden legend lens covers
* Environmentally sealed models available (specify modification code "W")
* Industry standard 0.698 " square mtg . hole
* < 3.0" behind panel depth

* Matching annunciator (p/n 644-3210)

Electro-Mech has introduced its Series 644-2100 compact quad lamp / LED pushbutton switch assembly. It mounts in a 0.698 square mounting hole and accomodates up to four T-1 sub midget flange based lamps or LED's for maximum brightness or lamp redundancy. With circuitry up to 2PDT, this switch offers maximum display versatility in a compact package.

## electro-mech

## Series 644-2100

Front Panel Mount, Dual or Quad Lamp/LED Pushbutton Switch

| Ratings: | 30 volts DC or 125 volts AC; 2.0A resistive, 0.5 A inductive |
| :---: | :---: |
| Weight: | 0.8 oz. (23 g) (approx.) |
| Operating Pressure: | $2 \mathrm{lbs} . \pm 1 \mathrm{lb} .(908 \mathrm{~g} \pm 454 \mathrm{~g})$ |
| Plunger Travel: | 0.187 nominal ( 4.7 mm ) |
| Actuations: | 100,000 minimum |
| Contacts: | Silver plated (gold plating optional) |
| Terminals: | Standard EMC solder lug. Accepts two 20 AWG wires. PC pin terminals also available. |
| Lens: | Accomodates a $0.645^{\prime \prime}$ ( 16.4 mm ) square lens. |
| Lamp or LED: | Accommodates four T-1 (3mm) submidget flange base lamp or LED. Lamp circuit is independent. |

## Front Panel Mounting

The switch mounts to the front panel using a mounting case that slides on from behind the panel and attaches to the switch case with a locking arm behind the panel. The locking arm is tightened with a screw located beneath the pushbutton lens which is removeable from the front panel. Lamp replacement also possible from the front panel.

HOW TO ORDER: All configurations in this product Series 644-2100 require a custom part number assigned by Electro-Mech due to many switch, lens, display, filters, and legend configuration options. Please call (626) 442-7180 for a custom part number (e.g. SW44xxx-xxx).

Part Number Table:

| 644-xxxx |  |  | - 2PST- |  |  | 1PDT | 2PDT | Notes: |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | - SPST- |  |  |  | 1N.O. |  |  |  |
| Action | 1N.O. | 1N.C. | 2N.O. | 2N.C. | 1N.C. |  |  |  |
| Momentary | 2128 | 2129 | 2130 | 2131 | 2132 | 2149 | 2150 |  |
| Snap Feel Mom. | 2428 | 2429 | 2430 | 2431 | 2432 | 2449 | 2450 | Artificial click in momentary travel. |
| Push-On/Push-Off | 2228 | 2229 | 2230 | 2231 | 2232 | 2249 | 2250 |  |
| Push-On/Remain-In/ Push-Off | 2328 | 2329 | 2330 | 2331 | 2332 | 2349 | 2350 | Button is physically depressed in down position. |
| Terminals Used: | 1-2 | 2-3 | $\begin{aligned} & 1-2, \\ & 4-5 \end{aligned}$ | $\begin{aligned} & 2-3, \\ & 5-6 \end{aligned}$ | $\begin{aligned} & 1-2 \\ & 5-6 \end{aligned}$ | 1-2-3 | $\begin{aligned} & 1-2-3, \\ & 4-5-6 \end{aligned}$ | See schematic below for terminal location. |

For non-illuminated version, specify the digit " 1 " in the first position (e.g. 1150).
For indicator/annunciator only, specify part number 644-3210.
For LED installation, verify LED polarity: if $\mathrm{V}+$ connected to terminal $B$ (common), cathode LED's should be specified.

## Series 400

## Multi-Switch Interlocking Assembly Sub Panel Mounting Interlocking or Independent Stations

- Uses Series 2100 or 2600 Switches
- SPST - 6PDT switch circuitry
- Easy lamp replacement from front
- T 1-3/4 midget flange-based lamp or LED with replaceable lens covers in standard EMC colors

P/N 421-6/Type 4/
GH2150,WL163W

- 2 to 24 stations standard; Larger assemblies available
- No barriers between stations

P/N 401-3/Type 1/GH3050,WL163W

Electro-Mech's Series 400 Multi-Station Switch Assemblies provide numerous configurations to meet a wide range of applications. Many standard mounting frames are available, and custom designs can be readily provided with custom "SW" drawing specifications.

Several types of mechanical/lockout actions between switch stations can be provided. The mechanical linkage between switch stations is made with electrofilmed steel parts, and is actuated by stainless steel pins. All Series 2100 and Series 2600 switches from SPST to 6PDT can be used in the multistation assemblies.

More than one style of intelock/lockout relationship can be utilized in the same assembly. For example, in a five station assembly, three switches can be interlocked and locked out, and the other two switches operated independently. In addition, switches can be wired so the light comes on when the switch is action (standard lamp circuit is independent of switch circuit).

## Series 400

## Multi-Switch Interlocking Assembly Sub Panel Mounting Interlocking or Independent Stations

GENERAL SPECIFICATIONS: (Series 2100 or 2600) Ratings: 30 volts DC or 125 volts AC; 2.0A resistive, 0.5 A inductive

Operating Pressure:
Plunger Travel:
$2 \mathrm{lbs} . \pm 1 \mathrm{lb} .(908 \mathrm{~g} \pm 454 \mathrm{~g})$
0.187 nominal ( 4.7 mm ) Switches accomodate standard EMC lenses and options. Lenses accomodate one T 1-3/4 mfb lamp or LED.

P/N 421-6/Type 4/GH2150,WL163W

3/4" Centers/401=Single Row/421=Double Row

## ASSEMBLY TYPES AND FUNCTIONS - Series 400 and 500 Assemblies

TYPE 1: INDEPENDENT. Mounting frame only. No interaction between switches.
TYPE 2: MOMENTARY AND LOCKOUT. Each switch has momentary action, no two switches can be actuated at the same time (uses GH2100 momentary switch).

TYPE 3: INDEPENDENTLY MAINTAINED AND LOCKED OUT. Each switch locks down when depressed and can only be released by depressing it again; no two switches can be operated at the same time (uses GH2300/GH2800 switches).

TYPE 4: INTERLOCK AND LOCKOUT. Each switch locks down when
depressed, and is released by pushing any other switch in the same assembly; no two switches can be operated at the same time (uses GH2100/GH2600) switches. (Note: interlock mechanism is external to switch action and thus uses momentary switches).

TYPE 5: MAINTAINED WITH MASTER RELEASE. Each switch locks down when depressed, and is released only by pushing a master release button mounted in the same assembly. One or more switches can be actuated at the same time and all actuated switches are released when the master release button is depressed.

TYPE 7: MAINTAINED WITH REMOTE MASTER RELEASE AND MASTER RELEASE LOCKOUT. Same as Type 6 except that when the master release button is actuated and releases the depressed switches, it prevents further actuation of any of the switches. The master release must then be re-actuated to release the lockout.

TYPE 8: INTERLOCK AND LOCKOUT WITH MASTER RELEASE. Each switch locks down when depressed and is released by any other switch in the assembly or by a master release button in the same assembly.

TYPE 9: INTERLOCK AND LOCKOUT WITH REMOTE MASTER RELEASE. Same as Type 8 except the master release can be located in any remote location. Release button is wired to a solenoid in the assembly which releases the depressed switch.

TYPE 10: INTERLOCK AND LOCKOUT WITH REMOTE MASTER RELEASE AND MASTER RELEASE LOCKOUT. Same as Type 9 except that when the master release button is actuated and releases the locked switch, it prevents further actuation of the switches. The master release must then be re-actuate to release the lockout.

TYPE 6: MAINTAINED WITH REMOTE MASTER RELEASE. Same as Type 5 except release button can be located in any remote location. Release button is wired to a solenoid in the assembly which releases the depressed station(s).

## electro-mech

## Series 500

## Multi-Switch Interlocking Assembly Front Panel Mounting

 Chrome Plated Barriers Between Stations

P/N 503-4/Type 4/GH2652,WL165W-FG,D327 engr SERIES,500,TYPE,4

P/N 502-2/Type 4/Vert/GH2654,WL163G,R-FG, D327 engr ON, OFF (white fill)

Electro-Mech Series 500 offers a line of front panel mounting assemblies which utilize Series 2100 or Series 2600 pushbutton switches. These assemblies feature long lasting chrome barriers that border each individual lens and adds a clean and durable appearance to the front panel. Assemblies are available in four styles with each being able to utilize all ten types of tracking action and switching sequences, as listed with the Series 400 specifications. The chart below shows the dimensional configurations for three of the four different styles (single row or double row, $0.87^{\prime \prime}$ or $1.00^{\prime \prime}$ centers) and can be custom modified to meet specific requirements.

Mounting: Series 500 assemblies push in from the front of the panel and attach with a mating " $U$ " shaped mounting bracket behind the panel. Mounting bracket is attached to the switch assembly with screws as provided behind the panel.

Series 502 (uses L163 lens)

Notes:

1. Chrome barriers are supplied unless otherwise specified. Other colors are black, grey, \& white. 2. Special requirements such as different switches, lenses, and lens legends at different stations require a drawing number (SW4xxxx) to be assigned at no charge.

## Part Number Description for Multi-Station Switch Assemblies

Lens legends: Specify legends by appending "engr" plus the actual characters on the lens. Separate each station by a comma. Separate lines on a single lens with a slash (e.g. engr STOP, READY, STATION/4). Specify photo positive (PP) or photo negative (PN) legend films after the lens color (e.g. L153W/PP).
