REACH Compliance Statement
Declaration for SVHC 169 List (Release date: 20 June 2016)

The EU regulation EC 1907/2006 which covers the Registration, Evaluation, Authorization and Restriction of Chemical substances is an EU regulation that became effective on 01 June 2007. The purpose of this legislation is to ensure human and environmental health by regulating Substances of Very High Concern, or SVHC's. These substances are listed in the REACH legislation and available at:

<http://echa.europa.eu/web/guest/regulations/reach/>

Electro-Mech Components is a downstream user of any SVHC substances that are used in the manufacture of our raw materials. None of the end products we produce for our customers have any SVHC substances in concentrations above the minimums contained in the legislation, typically < 0.1% w/w. None of our products consist of chemical substances required registration of raw materials in any form.

EMC will continue to monitor its suppliers, and if any substances begin to be included in our products that require registration, we will inform our customers according to the REACH legislation.

As of 20 June 2016, there are 169 chemicals on the SVHC list.
